

# Setting Up Application Environment

## Docker Installation

Date	10 Nov 2022
Team ID	PNT2022TMID32325
Project Name	Smart Fashion Recommender Application

### Step 1:

Go the official Docker website:

<https://docs.docker.com/desktop/install/windows-install/>

The screenshot shows the Docker Desktop installation page for Windows. The page is titled "Install on Windows" and includes a "Docker Desktop terms" section, a "Download Docker Desktop for Windows" button, and a "System requirements" section. The page also features a sidebar with navigation links and a "Page details" section on the right.

**Install on Windows**

**Docker Desktop terms**

Commercial use of Docker Desktop in larger enterprises (more than 250 employees OR more than \$10 million USD in annual revenue) requires a paid subscription.

Welcome to Docker Desktop for Windows. This page contains information about Docker Desktop for Windows system requirements, download URL, instructions to install and update Docker Desktop for Windows.

**Download Docker Desktop for Windows**

[Docker Desktop for Windows](#)

For checksums, see [Release notes](#)

**System requirements**

Your Windows machine must meet the following requirements to successfully install Docker Desktop.

WSL 2 backend    Hyper-V backend and Windows containers

## Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

## Step 3:

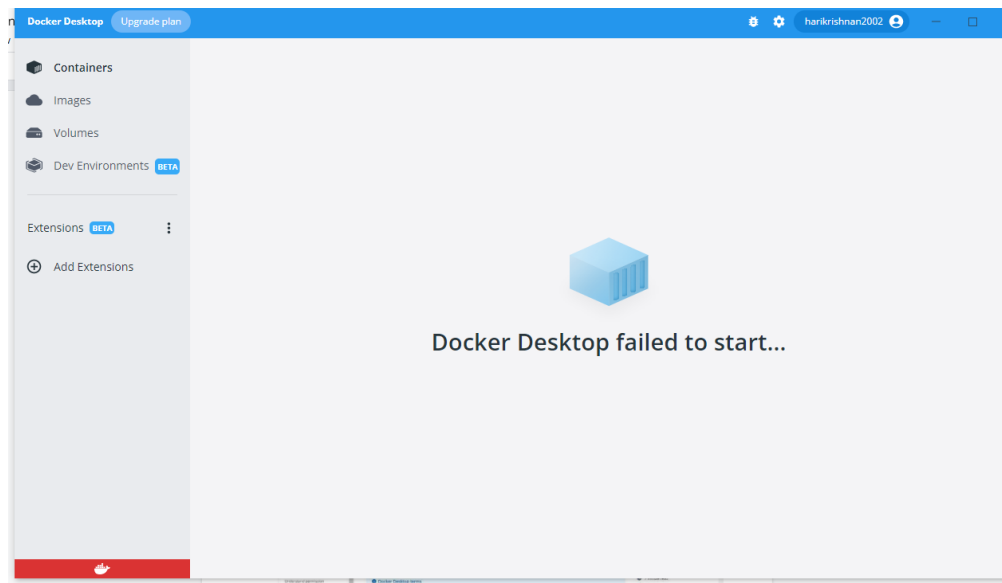

Go to downloads in browser (or) type **ctrl + J**, it will navigate to download page and double-click the particular docker file.

## Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

## Step 5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

## Step 6:

Finally, the docker is installed successfully.
